CLAIMS

What is claimed is:

1.   A computer implemented method of providing user requested music comprising:

receiving user input defining a plurality of music search parameters, wherein some of the

plural music search parameters describe music content; and

searching for music samples based upon the user provided search parameters.

2.   The method of Claim 1, further comprising:

presenting music samples to the user based upon the user provided input parameters.

3.   The method of Claim 2, further comprising:

determining if the user wants to buy any of the presented music samples.

4.   The method of Claim 3, further comprising:

determining if the user wants to sample another set of music samples similar to

the music purchased.

5.   The method of Claim 3, further comprising:

determining if the user wants another set of music samples that is different than

the purchased music.

6.   A computer system for providing user requested music comprising:

an input module for receiving user defined parameters for searching music; and

a searching module for searching music based upon the user defined parameters.

7. A computer implemented method for tracking user purchases, comprising:

providing a purchase ticket to the user; and

tracking user purchases with the purchase ticket.
